Summary

AI Engineer who designs, evaluates, and deploys LLM systems (RAG, agentic workflows, multimodal extraction) on FastAPI and Docker, owning eval metrics end to end with benchmarks, CI-gated regression tests, and tracing.

Education

National University of Sciences and Technology (NUST)

Sep 2022 – Jun 2026

Bachelor of Electrical Engineering

Islamabad, Pakistan

Technical Skills

LLM & Agentic AI: RAG, Agentic Workflows, Multi-Agent Systems, Prompt & Evaluation Design (LLM-as-Judge), Hybrid Search (BM25, RRF), Vector Databases (FAISS, ChromaDB), LangChain, Gemini API, Groq, Ollama, Langfuse

NLP: Embeddings (Sentence Transformers, bge-small), Tokenization, Information Extraction, Transformers

Machine Learning: PyTorch, Keras, TensorFlow, Scikit-learn, Supervised & Unsupervised Learning, Ensembles, Feature Engineering, Pandas

Backend & APIs: Python, FastAPI, REST APIs, Inference Pipelines, SQL, SQLAlchemy, Next.js, Playwright

MLOps & Cloud: Docker, GitHub Actions, CI/CD, Testing (pytest), Git, Microsoft Azure, Google Cloud, Render

Projects

Parity – AI Web Accessibility Auditor | Python, FastAPI, Playwright, Gemini parity-iota-puce.vercel.app

- Built a WCAG 2.2 auditor that runs axe-core in headless Chromium (desktop + mobile), adding a pixel-based contrast meter, a keyboard-navigation agent, and a Gemini vision agent that rewrites faulty alt text.
- Raised recall on a 24-issue labelled benchmark from 54% (rules alone) to 24/24 with zero false alarms; consistency checks lifted vision-agent precision from 80% to 100%.
- Shipped FastAPI (Docker, Render) with a job queue, rate limits, and SSRF protection, plus hybrid RAG (BM25 + bge-small, RRF) over 1,092 W3C passages with verified quotes; 190+ tests, eval gates in CI.

Rehnuma – AI Copilot for Electricity Bills | Python, FastAPI, Next.js, Gemini rehnuma-kappa.vercel.app

- Built an Urdu/English copilot that audits electricity bills with a deterministic engine and reads bill photos via Gemini with a self-verifying re-read loop (96.2% field accuracy); forecasts 12 months of bills and prices 2026 solar rules on real meter data.
- Developed hybrid RAG (BM25 + character n-grams, RRF, LLM query rewriting) over 566 NEPRA clauses with a deterministic citation critic; held-out evals: 100% answered, 91% top-5 retrieval, 6/6 out-of-scope queries refused.
- Shipped FastAPI (Docker, Render) and Next.js (Vercel) with 319 tests, 20 eval metrics gated in GitHub Actions CI, Langfuse tracing with PII masking, and a NEPRA document watcher.

EdgarIQ – SEC Filings Copilot | Python, SEC EDGAR API, Ollama, Groq, JavaScript edgar-iq-web.vercel.app

- Built a grounded multi-agent RAG system over live SEC EDGAR filings with a planner–retriever–drafter–critic pipeline and a numeric grounding checker that verifies every generated figure against retrieved source text.
- Diagnosed a pure semantic-search failure causing wrong-quarter retrieval across near-identical filing periods, then designed a hybrid metadata-filtered retrieval fix that raised golden-set accuracy from 29% to 100%.
- Engineered an automated eval harness (deterministic + LLM-as-judge grading, regression tracking, HTML reports) backed by 89 unit/integration tests that caught real bugs pre-deployment; shipped a live-chat frontend on Vercel.

Experience

Machine Learning Engineer Intern

Jun 2025 – Aug 2025

RISETech

Islamabad, Pakistan

- Collected field data with an underground vibration, magnetic, and acoustic sensor node, and led feature extraction for supervised classification into LTV, HTV, and No Vehicle.
- Trained and evaluated ensemble classifiers (Random Forest, SVM, KNN, LDA, Extra Trees) with Scikit-learn, improving classification accuracy from 71% to 99%.
- Authored an IEEE-format research paper on the feature extraction method for multi-sensor vehicle classification.

AI Engineer Intern

Jun 2024 – Aug 2024

Software Productivity Strategists (SPS), NSTP

Islamabad, Pakistan

- Developed Python backend features for two flagship products: Business Management System (BMS) and Cognitive Service Management (CSM).
- Deployed AI solutions on Microsoft Azure and improved analytics and reporting for a security system.

Certifications

- Google AI Professional Certificate (Google) • Advanced ML on Google Cloud Specialization (Google Cloud)
- IBM Machine Learning Professional Certificate (IBM) • AWS Cloud Practitioner Essentials (AWS)
